

Use Case: Logout

Primary Actors: admin, end user

Preconditions: user is logged in

Postconditions: user is logged out

Main Success Scenario:

1. User selects logout link on any page
 2. System logs user out of system
-

When the user selects the logout link, the JSP code simply deletes the user's cookie from his/her local machine. Nothing is done on the server side.

There is no UML for this use case
